DESK STATEMENT 9/28

EPA has provided the state of Wyoming and its Northern Arapaho and Eastern Shoshone tribal partners with monitoring data regarding the agency's ongoing analysis of ground water quality in the Pavillion, Wyoming area. This data will be made publicly available once the Agency's partners have had an opportunity to review. The data, along with EPA's draft report and USGS data, will be submitted to an independent expert peer review panel later this year. EPA will also take public comment on its data and will be extending the comment period to give stakeholders sufficient time to consider all data related to the Pavillion, Wyoming groundwater investigation.
